

Equipment list

Condensing boilers (90%+) > 300 000 Btu/hr

IMPORTANT : In order to qualify for this grant, you must contractually commit with Énergir or an Énergir Authorized Partner prior to your appliances' installation. The total grant amount must not exceed admissible expenses. Some restrictions apply. The conditions of the program and the amount of the grants are subject to change without notice.

To benefit from the high efficiency due to condensation, the boiler must be installed on a heating system that provides a return water temperature to the boiler of 55 ° C (131 ° F) or less. The indoor/outdoor control of temperature via an external sensor also optimizes the operation of the boiler for space heating applications.

Equipment list

Condensing boilers (90%+) > 300 000 Btu/hr

IMPORTANT : In order to qualify for this grant, you must contractually commit with Énergir or an Énergir Authorized Partner prior to your appliances' installation. The total grant amount must not exceed admissible expenses. Some restrictions apply. The conditions of the program and the amount of the grants are subject to change without notice.

To benefit from the high efficiency due to condensation, the boiler must be installed on a heating system that provides a return water temperature to the boiler of 55 ° C (131 ° F) or less. The indoor/outdoor control of temperature via an external sensor also optimizes the operation of the boiler for space heating applications.

Equipment list

Condensing boilers (90%+) > 300 000 Btu/hr

IMPORTANT : In order to qualify for this grant, you must contractually commit with Énergir or an Énergir Authorized Partner prior to your appliances' installation. The total grant amount must not exceed admissible expenses. Some restrictions apply. The conditions of the program and the amount of the grants are subject to change without notice.

To benefit from the high efficiency due to condensation, the boiler must be installed on a heating system that provides a return water temperature to the boiler of 55 ° C (131 ° F) or less. The indoor/outdoor control of temperature via an external sensor also optimizes the operation of the boiler for space heating applications.
