

Policy on Hiring Partners and Employees of the External Auditors (the “Policy”)

1. POLICY STATEMENT

The objective of Énergir Inc. and Énergir, L.P. (collectively the "**Corporation**") is to prepare and disclose quality financial information by, among other things:

- 1.1 maintaining a culture of integrity;
- 1.2 applying and complying with acceptable accounting principles and auditing standards, based on the rules and guidelines adopted by the Canadian Securities Administrators, and using best practices as a benchmark; and
- 1.3 ensuring the external auditor is independent of the management of Énergir Inc. ("**Management**").

2. DEFINITIONS

Financial reporting oversight role: position held by a person who exercises or is able to exercise influence over i) the contents of the financial statements or ii) anyone who prepares them. Examples include a board member, the President and Chief Executive Officer, the Chief Financial Officer, the Executive Director, Corporate Finance, the Executive Director, Treasury, the Director, Treasury and any other person who participates in the preparation of financial statements.

Employee or partner of the external auditor who participates in audit activities: for the purposes of this Policy, this term includes all of the external auditor's partners, principals and employees having participated in the audit, review or assurance engagement of the financial statements of Énergir Inc. and Énergir, L.P. or one of their subsidiaries or joint ventures for at least 10 hours during the annual audit period.

3. POLICY OBJECTIVE

The objective of this Policy is to establish a process for hiring current or former employees of the external auditor to fill a Financial reporting oversight role in order to ensure auditor independence is maintained.

The external auditor's independence could be compromised if the Corporation were to hire one of the external auditor's former employees, who could, by reason of his/her knowledge of and relationships with the external auditor, negatively impact the effectiveness and quality of an audit. A loss of independence could also occur if an employee would be perceived as being influenced by the prospect of potential employment with the Corporation or its subsidiaries.
