Description of the work and/or operation of a vehicle or mobile equipment (attach sketch, photo or other relevant documentation)

Operation of a vehicle or mobile equipment on the Énergir easement or over the natural gas line

Tracked vehicles

Wheeled vehicles

Vehicles	During the work	After the work
	(characterize the heaviest loaded vehicle)	
Make/Model		
Number of axles		
Single/double wheels		
Maximum weight		
Length of the caterpillars (A)		
Width of the caterpillars (B)		

Warning: It is the requestor's responsibility to comply with the laws, regulations, codes and standards applicable to their work and to obtain all required permits and authorizations from the authorities. In addition, where applicable, the requestor is also responsible for obtaining the authorization of the landowner and any other holder of real rights.

The requestor must submit their request for authorization by email or mail to:

Email:
servitude@energir.com

Énergir - Real Estate Expertise

Authorization application process

Upon receipt of a request for authorization, Énergir will review the request within ten (10) business days, unless we notify the requestor otherwise. If an application is incomplete and/or the sketches are incomplete, we will return them to the requestor with an explanation of the corrections to be made. Should the request be refused, this will be communicated in writing, explaining the reasons for such a decision.

When a request for authorization is accepted, Énergir will send the requestor an authorization letter setting out the conditions to be met for the completion of the work and/or operation of a vehicle or mobile equipment. In addition, the requestor must SIGN that authorization and return it to us BEFORE the start of the work. A copy of the authorization must be kept on the site so that it can be provided at all times to Énergir's representative upon request. Otherwise, the representative may stop the work without notice.

The duration of the authorization to carry out the work will be written on the authorization. After this period, the requestor will have to apply for an extension of this authorization if the work has not been completed.

In the event of any changes to the application or to the field conditions, a new application for authorization must be made prior to the work.

Notice of start of work

IF REQUIRED in the authorization issued, at least five (5) working days before the start of the work, the requestor must contact Énergir's Control Office, having its file number on hand, so that an Énergir representative is present during the work to precisely locate the natural gas pipeline and supervise the work in accordance with the directives issued in the authorization.
